Information Disclosure Statement

The information disclosure statements filed June 17, 2004, August 2, 2004 and August 16, 2004 have been considered and have been made of record.

Response to Amendment

The preliminary amendment filed March 26, 2004 is acknowledged; wherein the applicant claims benefit to a non-provisional patent application serial number 60/459,411 filed on April 1, 2003 under 37 CFR 1.78(a)(4).

Obviousness-type Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of copending Application No. 10/811,008. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application and the copending application are viewed as claiming overlapping subject matter. The instant application claims a wax comprising a reaction product of (a) a C 6-12 linear

dicarboxylic acid and (b) a diamine of formula $H_2N(CH_2)_nNH_2$, wherein n is an integer of from 2 to 6 and a molar ratio of said C6-12 linear dicarboxylic acid to said diamine is from 0.97 to 1.06; which encompasses copending application'd wax comprising a reaction product of C6-12 linear dicarboxylic acid, C10-22 monocarboxylic acid and a diamine of the formula $H_2H(CH_2)_nNH_2$ wherein the n is an integer from 2 to 6 is specific amounts. The instant application and the copending application are claiming overlapping products and reactants. It is the position of the examiner that the claims of one application cannot be infringed without literally infringing the claims of the other. Therefore, the obviousness-type double patenting rejection is obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
